

K-LOVE is being played in more and more of our local establishments and a wonderful message of God's love and kindness is being heard by some who would not be hearing it otherwise. I am employed in a medical office and it is the only station we play and more and more of our patients are asking what it is and how they can find it. Our young people have an alternative to listen to now and the thought of that being taken away is very disconcerting. We pray the FCC will reconsider its plans. Thank you.
